NORD ENGINEERING

UNDERGROUND CONTAINERS

When the container becomes **urban furniture**.

CONTAINERS

UNDERGROUND

Underground containers have been designed to seamlessly integrate into any environment such as squares, streets, and historic centers. Integrated into a prefabricated structure, completely underground and waterproof, they do not require any electrical and/or hydraulic utilities.

The safety platform, designed to prevent accidental falls of objects or people during emptying operations, is equipped with a simple but effective counterweight system with mechanical locks.

The container, complete with the disposal tower, is isolated from rainwater and the containment structure is composed of ribbed walls that guarantee a more robust structure than necessary.

KEY FEATURES

- Easy installation
- Does not create architectural barriers
- Large volume
- Integration with electronic systems
- Sound insulation
- Simple maintenance
- Elimination of odors
- Customizable labeling
- UNI EN ISO 13071-1/2, UNI EN ISO 13071-3, UNI EN ISO 1461, EN10346 standards

MATERIALS

Container structure: galvanized steel + galvanization
Disposal mouth: stainless steel/galvanized + powder coating
Bottoms: steel + galvanization
Internal mechanics: steel + galvanization
Tank: concrete (C35/45 fibrated)

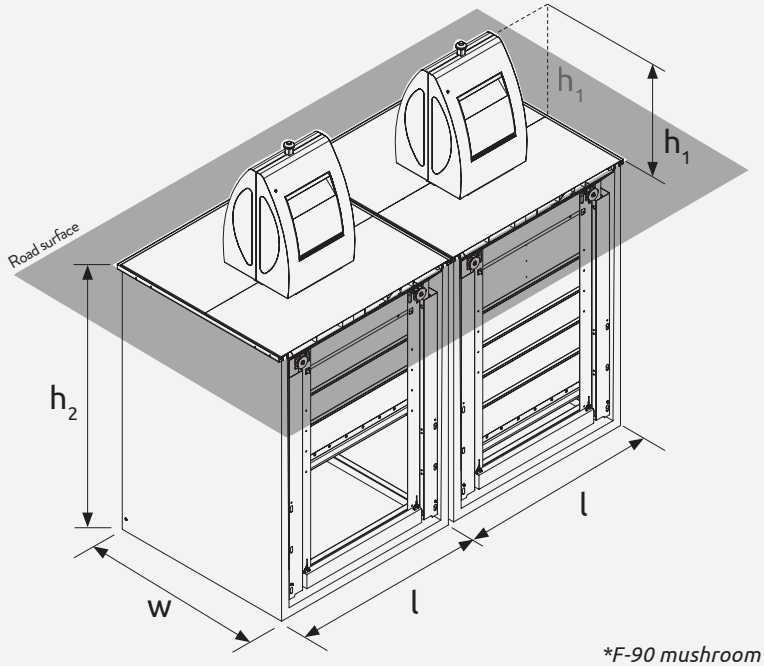

Underground
3000 lt e 5000 lt

Footprint on the road surface (l x w x h_1*): 1950 x 1950 x 1100 mm

Concrete tank dimensions (l x w x h_2): 1890 x 1890 x 2600 mm

Bottoms capacity: 310 lt

Models: 3 m³ and 5 m³

F-90 mushroom excluded
