EASY System

Technology, performance, sustainability and safety.
All in one waste collection system.
EASY is the innovative multi-purpose, fully automated, bilateral, and single-operator lifting system for the collection of differentiated urban solid waste.

INNOVATION

- Absolute safety for the operator, who never has to leave the cabin
- Suitable for every urban context and highly customizable
- Waste collection from both sides guarantees efficient comprehensive collection
- Cost reduction through optimization and lower maintenance
- Perfect and safe anchoring thanks to the innovative F-90 hooking device

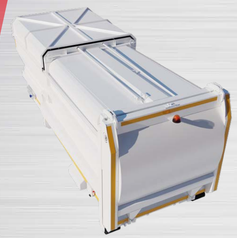

AUTOMATION

- Increased productivity and service quality for users
- Complete management of the collection process by the onboard vehicle system
- The automated system prevents human error and unforeseen events
- Faster emptying cycle and reduced collection frequency

WASHING MACHINE UNIT
fixed on chassis, or roll-off

COMPACTOR
fixed on chassis, or roll-off

OPEN-TOP BOXES
fixed on chassis, or roll-off

EQUIPMENT: One vehicle, three different solutions.

Containers connected
to the city's digital technological infrastructure

- Opening with smart key or app
- User recognition
- Real-time data transmission
- Fill-level monitoring
- Collection vehicles routing
- Reporting of malfunctions and tampering

The **SOFTWARE** automatically manages the entire process of collecting, handling, and emptying of containers under the supervision of the operator, who never needs to get out of the vehicle.

AUTOMATED MANAGEMENT

SOLID AND SECURE ANCHORING

SMART AND CONNECTED CONTAINERS

Our containers are born sustainable and will remain so forever

100% STEEL

100% RECYCLABLE

Produced in state-of-the-art facilities through continuously optimized processes to reduce energy consumption and environmental impact, **Nord Engineering containers are made of 100% infinitely recyclable steel.**
