CUBE CONTAINERS

Capacity and functionality serving citizens and businesses.

CONTAINERS

CUBE & HAT

The large-volume Cube Standard and Hat containers are particularly suitable for the industrial and large-scale distribution sectors.

Simple in design, with considerable capacity and functionality, they can be equipped with disposal mouths of various types and sizes. Their different volumes allow for the selective collection of industrial packaging as well as waste produced by urban users. The Hat containers, in particular, provide innovative dual functionality: they allow for the containment of material from small vehicles used for waste collection equipped with tipping bins.

It is no longer necessary to make the usual trip to the unloading area but to one of the containers, which in turn are collected and emptied by vehicles equipped with Easy equipment as part of a regular work shift.

KEY FEATURES

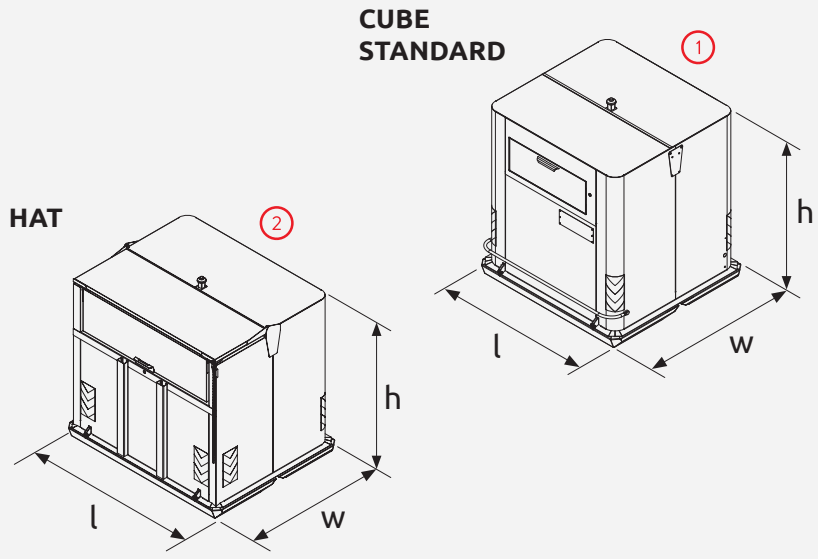

- Customizable disposal methods
- Customizable colors and communication methods
- Integration with electronic systems
- Simple maintenance
- Wide range of volumes
- UNI EN ISO 13071-1, UNI EN ISO 13071-3, UNI EN ISO 1461, EN10346 standards

MATERIALS

Container structure: steel + galvanization
Disposal mouth: stainless steel/galvanized + powder coating
Bottoms: steel + galvanization
Internal mechanics: steel + galvanization
Rubber - PVC Bands

1 **Cube standard 5000 lt**
Dimensions (l x w x h):
1825 x 1735 x 1905* mm
Bottoms capacity: 350 lt

2 **Hat 6000 lt**
Dimensions (l x w x h):
2135 x 1735 x 1905* mm
Bottoms capacity: 405 lt

*F-90 mushroom excluded
